William "Chase" Culbertson

West Lafayette, IN | wculbert@purdue.edu | explodingcb.com | linkedin.com/in/chase-culbertson | github.com/Sculptor-AI

Computer Engineering student who builds on real hardware: two years running on-prem GPU servers and networking, and a datacenter internship at comma.ai next summer. Also shipped an iOS app and Safari extension as lead engineer.

EDUCATION

Purdue University — **Aug 2026 - May 2030 (expected)**
B.S. in Computer Engineering. Purdue Presidential Scholarship recipient — **West Lafayette, IN**

Lakeside School — **Graduated May 2026**
High School Diploma. ACT: 34 — **Seattle, WA**

EXPERIENCE

Datacenter Intern (incoming) — **Summer 2027**
comma.ai, makers of openpilot — **San Diego, CA**

- comma.ai builds openpilot, open-source hands-off, eyes-on driver assistance for 350+ cars, trained in-house.

Co-Founder and Backend Lead — **Jun 2024 - Jun 2026**
Project Andromeda, on-prem LLM inference platform at Lakeside School — **Seattle, WA**

- Secured a $12,000 GPU budget from the Head of School over a subscription path priced near $600K/year.
- Ran the platform on the school's own bare-metal GPU servers, with capacity monitoring across a phased rollout from 25 pilot accounts to 600+ users.
- Built the backend: multi-model routing, per-user auth, usage analytics, WolframAlpha and citation-lookup tools.

Infrastructure Intern — **Summers 2022 - 2025**
Lakeside School Technology Department — **Seattle, WA**

- Deployed campus devices and printer infrastructure; laid the groundwork for the school's AI access program.

Co-Founder and CEO — **2023 - Present**
SculptorAI, nonprofit AI research organization, 501(c)(3) pending (sculptorai.org) — **Remote**

- Built TurnPilot, a fork of openpilot that rebuilds Navigate inside the BeamNG.drive simulator, and wrote up what should carry over to a real car.
- Released the Ursa model family on Hugging Face.
- Maintain aiportal, the MIT-licensed multi-model chat platform behind Andromeda, as lead developer (~470 commits).

Researcher — **2025 - Present**
Google TPU Research Cloud — **Remote**

- Training a diffusion language model in JAX/XLA on granted TPU capacity, based on DeepMind's DiffusionGemma.

Lead Software Engineer — **Jun 2026 - Present**
Silk Shopping, AI shopping assistant (silk-shopping.com) — **Remote**

- Shipped the Silk iOS app and Safari extension to the App Store; own app, web, and backend development.

SKILLS

Languages: C++, Python, Java, Swift, SwiftUI, JavaScript/Node, SQL

Hardware and Infrastructure: on-prem GPU servers, homelab, Linux, Docker, networking, vLLM, Ollama, TPU/XLA

Machine Learning: PyTorch, JAX, Hugging Face Transformers, fine-tuning, distillation, RAG, evaluation

Web and Data: Flask, React, PostgreSQL, MongoDB, Git

Platforms: comma.ai openpilot (open-source ADAS, comma hardware), iOS/macOS, Safari extensions, App Store

Spoken: Spanish (conversational)

AWARDS AND ACTIVITIES

COMMA_HACK 7, 3rd Place, comma.ai, San Diego, CA — **Sep 2026**

Eagle Scout with three palms, Boy Scouts of America. Eagle project: scam-awareness and tech training for seniors.
